Ideation Phase
Brainstorm & Idea Prioritization Template

Date	31 October 2026
Team ID	To be filled by project team
Project Name	Global Olympic Sports Performance Analysis Using Tableau
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solvingUse this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Project team – Idea 1	Compare countries by distinct Olympic medals and rank top performers.	Country performance	1
2	Project team – Idea 2	Compare medals per athlete and medal distribution across sports.	Sport strategy	1
3	Project team – Idea 3	Analyze investment against medals and regional efficiency, once verified funding and region data are added.	Investment & efficiency	2
4	Project team – Idea 4	Tell the historical story of medal trends, host-country results, and regional medal share.	Trends & storytelling	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/ Low)	Importance (High/Medium/ Low)	Priority	Selected (Yes/No)
1	National performance dashboard: country rankings, sport medal returns, sport treemap	High	High	1	Yes
2	Investment and regional efficiency dashboard with validated supplemental datasets	Medium	High	2	Yes – after data integration
3	Olympic history dashboard: yearly trends, host-country comparison, regional sport distribution	Medium	High	3	Yes – after mapping

Final Prioritized Solution

Build nine interactive Tableau visualizations across three dashboards and four Tableau Story points. Publish dashboards, embed them in a Flask interface, test performance, and record a demonstration. Prioritize views supported by athlete_events.csv; add verified investment, region and host-NOC reference data before making corresponding claims.
