Ideation Phase
Define the Problem Statements

Date	31 October 2026
Team ID	To be filled by project team
Project Name	Global Olympic Sports Performance Analysis Using Tableau
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Priya, a National Olympic Committee performance strategist	identify high-yield sports and compare national medal performance	medal and participation records are spread across countries, sports and Olympic editions	raw data are difficult to compare fairly, and team medals can be double-counted	uncertain about where to direct athlete-development resources
PS-2	Carlos, a sports investment analyst	compare funding levels, medal outcomes and regional efficiency	Olympic participation records alone do not contain investment or regional classifications	funding impact cannot be assessed without validated supplementary data and consistent metrics	unable to confidently justify evidence-based grant recommendations

Additional Stakeholder Problem Statement (PS-3)

I am William Robert, an Olympic broadcast journalist. I am trying to explain medal trends, host-nation achievements, and regional sport performance, but the historical data are fragmented and the current dataset stops in 2016. Because later Olympic editions and host/region mappings are missing, I cannot present a complete 1992–2026 narrative without additional verified sources. This makes me concerned about accuracy and clarity for viewers.

Consolidated Project Problem Statement

Stakeholders need an accessible, interactive way to examine Olympic medal achievements, athlete participation, sport-specific returns, country rankings, regional differences, and historical changes. The solution will provide nine Tableau visualizations in three dashboards, organized into a four-point story and embedded in a Flask interface. The available athlete_events.csv covers 1896–2016 (271,116 records; 15 fields); project views will focus on 1992–2016 until later editions are sourced. Investment, region and host-NOC data must be added and validated for the corresponding analyses.
