Ideation Phase
Empathize & Discover

Date	31 October 2026
Team ID	To be filled by project team
Project Name	Global Olympic Sports Performance Analysis Using Tableau
Maximum Marks	4 Marks

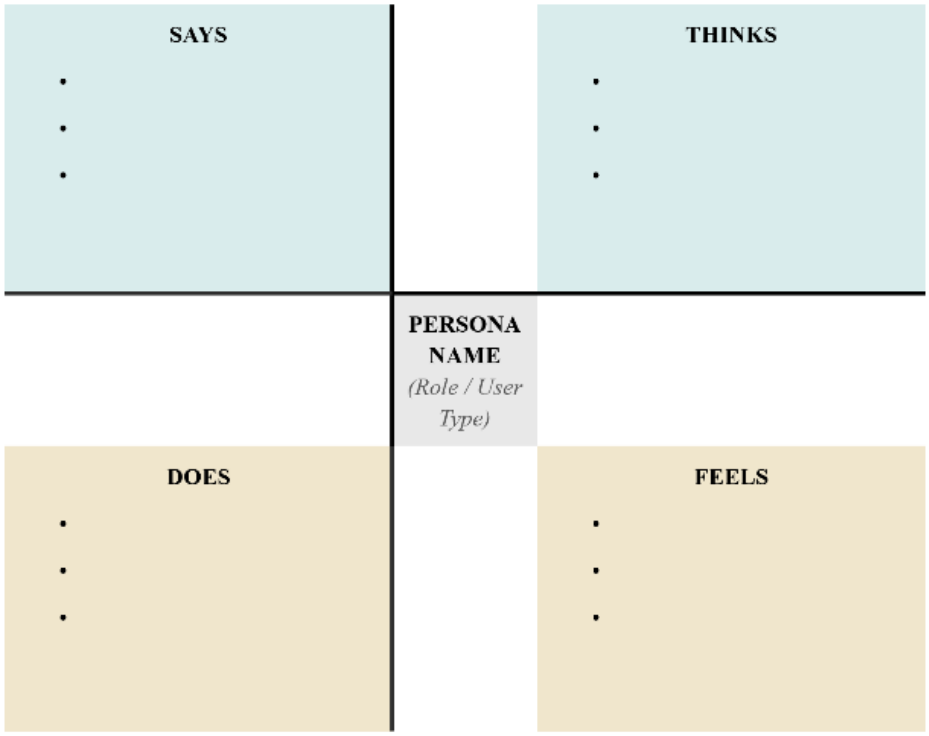

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Completed Empathy Map – Priya (National Olympic Committee Strategist)

SAYS	Which sports give our country the strongest medal returns? How do we compare with leading countries?
THINKS	Investment should follow reliable sport-level evidence; participation and team medals must be interpreted carefully.
DOES	Filters by country, year, season and sport; compares medal rankings, medals per athlete and sport distribution.
FEELS	Responsible for choosing priorities; frustrated by fragmented records and potentially misleading medal counts.
PAINS	Large historical dataset, inconsistent medal counting, limited ability to isolate competitive disciplines.
GAINS	Actionable sport priorities, comparable country rankings and an interactive evidence base.

Completed Empathy Map – Carlos (Sports Investment

Analyst)

SAYS	Which countries deliver more medals for the investment they receive?
THINKS	Funding decisions need credible financial figures and fair regional comparisons.
DOES	Compares country medals, athlete participation, regional efficiency and investment scatterplots.
FEELS	Accountable for transparent grants; cautious about unsupported claims.
PAINS	No investment or region field in athlete_events.csv; risk of misleading efficiency comparisons.
GAINS	Transparent allocation evidence after validated investment and region data are integrated.

Completed Empathy Map – William Robert (Olympic Journalist)

SAYS	How have medal totals changed, and which host nation performed strongly at home?
THINKS	Viewers need clear, engaging, accurate comparisons across editions and regions.
DOES	Uses trend lines, host comparisons and regional sport distributions to develop stories.
FEELS	Curious and creative, but concerned about incomplete recent-year coverage.
PAINS	Current data end in 2016; host-country and region mappings are absent.
GAINS	Compelling data-backed visuals and a reusable Tableau Story for documentary narratives.

Data note: Athlete-event rows are not the same as distinct Olympic medals. Use an event/year/season/NOC/medal key for country medal comparisons; use athlete-level counts only when explicitly labeled. Do not report 2020–2026 or investment conclusions without validated additional data.
