Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Velocity:

Planned velocity assumption: 20 story points per 6-day sprint. Average delivery rate = completed story points ÷ sprint duration = 20 ÷ 6 = 3.33 story points per day. This is a planning assumption; replace it with the team's measured velocity after completed sprints.

Burndown Chart:

A burndown chart shows remaining work (story points) against time during a sprint. For this project, begin each sprint at 20 points and update remaining points daily as tasks are completed. Do not enter estimated completion values as actual results.

Project scope and data assumptions

• Main dataset: athlete_events.csv (271,116 rows; Olympic records from 1896–2016; Summer and Winter).

• The analysis brief requests 1992–2026, but the supplied dataset only supports analysis through 2016. Do not imply that 2020, 2024, or 2026 results are included.

• Investment-versus-medal analysis requires a verified sports-investment dataset. Regional charts require a verified NOC-to-region mapping. Host comparison requires a verified Year + Season + Host NOC lookup.

• Medal Count counts athlete-medal records. Unique Medal Key with COUNTD is intended to avoid counting every member of a medal-winning team as a separate medal; validate the key against the event data before final submission.

• Medal Efficiency is a project-defined ratio, not an official Olympic metric. State its denominator and filters when presenting results.

• Planned backlog totals 80 story points (20 per sprint). Sprint dates, actual completed points, release dates, and team members are intentionally left for the team to fill in.

Date	02 November 2026
Team ID	PNT2022TMIDxxxxxx (replace with actual Team ID)
Project Name	Olympic Games Data Analysis – Tableau Project
Maximum Marks	8 Marks

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Data Preparation	US-01	As a project analyst, I can connect and inspect the athlete_events.csv dataset so that the Olympic records are ready for analysis.	5	High	[Add member name(s)]
Sprint-1	Calculated Metrics	US-02	As an analyst, I can create Medal Count, Unique Medal Key, Medal Efficiency, and Medals per Athlete calculated fields.	5	High	[Add member name(s)]
Sprint-1	National Performance	US-03	As a strategist, I can compare average medals per athlete by sport to identify sports with stronger medal returns.	3	High	[Add member name(s)]
Sprint-1	National Performance	US-04	As a strategist, I can view the top 15 countries by distinct medal count.	3	High	[Add member name(s)]
Sprint-1	National Performance	US-05	As a strategist, I can view medal distribution by sport in a treemap.	4	High	[Add member name(s)]
Sprint-2	Supplementary Data	US-06	As an analyst, I can add verified country-region, host-country, and sports-investment lookup data where available.	5	High	[Add member name(s)]
Sprint-2	Investment Analysis	US-07	As an investment analyst, I can compare sports investment with distinct medal performance using a scatter plot.	5	High	[Add member name(s)]
Sprint-2	Regional Analysis	US-08	As an analyst, I can compare average medal efficiency across regions.	3	Medium	[Add member name(s)]
Sprint-2	Country Efficiency	US-09	As an analyst, I can rank countries by medal efficiency while filtering out very small participation samples.	4	High	[Add member name(s)]
Sprint-2	Data Validation	US-10	As a project team, we can validate distinct medal counts and check that supplementary data relationships do not duplicate records.	3	High	[Add member name(s)]
Sprint-3	Olympic Trends	US-11	As a storyteller, I can view the trend of distinct medals by Olympic year and season.	3	High	[Add member name(s)]
Sprint-3	Host Performance	US-12	As a storyteller, I can compare host nations' medal counts during their home Olympic Games using a verified host lookup.	4	High	[Add member name(s)]

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-3	Regional Distribution	US-13	As a storyteller, I can view regional medal distribution by sport in a donut chart.	4	Medium	[Add member name(s)]
Sprint-3	Dashboard Design	US-14	As a user, I can explore Dashboard 1: National Olympic Performance with its three linked visualizations and filters.	3	High	[Add member name(s)]
Sprint-3	Dashboard Design	US-15	As a user, I can explore Dashboard 2: Investment and Regional Efficiency with its three visualizations and filters.	3	High	[Add member name(s)]
Sprint-3	Dashboard Design	US-16	As a user, I can explore Dashboard 3: Olympic Trends with its three visualizations and filters.	3	High	[Add member name(s)]
Sprint-4	Tableau Story	US-17	As a presenter, I can navigate a four-point Tableau Story covering the overview and all three scenarios.	4	Medium	[Add member name(s)]
Sprint-4	Flask Integration	US-18	As a viewer, I can open the published Tableau dashboards and story through a Flask website with navigation.	8	High	[Add member name(s)]
Sprint-4	Testing	US-19	As a project team, we can test filters, calculated fields, chart accuracy, dashboard responsiveness, and embed behavior.	4	High	[Add member name(s)]
Sprint-4	Documentation & Demo	US-20	As an evaluator, I can review project documentation and a demonstration video explaining the dataset, calculations, dashboards, story, and Flask site.	4	High	[Add member name(s)]

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	TBD	TBD	TBD	TBD
Sprint-2	20	6 Days	TBD	TBD	TBD	TBD
Sprint-3	20	6 Days	TBD	TBD	TBD	TBD
Sprint-4	20	6 Days	TBD	TBD	TBD	TBD
